

2.1 an individual sewage treatment system at the direction and under the personal supervision
2.2 of a person licensed under this section.

2.3 A person constructing an individual sewage treatment system under clause (2) must
2.4 consult with a site evaluator or designer before beginning construction. In addition, the
2.5 system must be inspected before being covered and a compliance report must be provided
2.6 to the local unit of government after the inspection.

2.7 (c) The commissioner, in conjunction with the University of Minnesota Extension
2.8 Service or another higher education institution, shall ensure adequate training and design
2.9 guidance exists for individual sewage treatment system professionals.

2.10 (d) The commissioner shall conduct examinations to test the knowledge of applicants
2.11 for licensing and shall issue documentation of licensing.

2.12 (e) Licenses may be issued only upon successful completion of the required
2.13 examination and submission of proof of sufficient experience, proof of general liability
2.14 insurance, and a corporate surety bond in the amount of at least \$10,000.

2.15 (f) Notwithstanding paragraph (e), the examination and proof of experience are not
2.16 required for an individual sewage treatment system professional who, on the effective date
2.17 of the rules adopted under subdivision 1, holds a certification attained by examination and
2.18 experience under a voluntary certification program administered by the agency.

2.19 (g) Local units of government may not require additional local licenses for individual
2.20 sewage treatment system professionals.

2.21 (h) A pumper whose annual gross revenue from pumping systems is \$9,000 or
2.22 less and whose gross revenue from pumping systems during the year ending May 11,
2.23 1994, was at least \$1,000 is not subject to training requirements in rules adopted under
2.24 subdivision 1, except for any training required for initial licensure.

2.25 (i) ~~Until December 31, 2010, No other professional license is required to:~~

2.26 ~~(1) design, install, maintain, or inspect, or provide service for an individual sewage~~
2.27 ~~treatment system with a flow of 10,000 gallons of water per day or less if the system~~
2.28 ~~designer, installer, maintainer, or inspector, or service provider is licensed under this~~
2.29 ~~subdivision and the local unit of government has not adopted additional requirements; and~~

2.30 ~~(2) operate an individual sewage treatment system with a flow of 10,000 gallons~~
2.31 ~~of water per day or less if the system operator is licensed as a system designer, installer,~~
2.32 ~~maintainer, or inspector under this subdivision and the local unit of government has not~~
2.33 ~~adopted additional requirements.~~
